MARCH 1, 2023

EDM ANNOUNCES NON-BROKERED PRIVATE PLACEMENT

Halifax, Nova Scotia, March 1, 2023 – EDM Resources Inc. (TSX-V: EDM) (“EDM” or the “Company”) is pleased to announce a non-brokered hard dollar and flow-through private placement for aggregate gross proceeds of up to C\$1,650,000 (the “Offering”).

The Company’s President and CEO, Mr. Mark Haywood, commented: *“We are very pleased to provide an opportunity for investors to participate in this private placement, which the Company anticipates being the last prior to the commencement of commercial production presently scheduled for January 2024. The majority of the net proceeds of the hard dollar component of this financing is planned to exchange the Company’s C\$3 million cash environmental bond with a surety environmental bond, which in effect releases the C\$3 million to EDM’s treasury. The proceeds of the flow-through component of the financing will be used to advance the Company’s exploration projects which are near to the Scotia Mine.*

With only 20 million shares currently issued and outstanding, EDM is a tightly held, publicly traded mining company which in the last 3 years has taken the Scotia Mine from a moth-balled project to a permitted and compliant mine, financed to commercial production by one of the world’s largest traders of physical non-ferrous metals, Geneva based IXM S.A.”

The hard dollar component of the Offering is a non-brokered private placement of up to 3,000,000 units (“HD Units”) of the Company (the “Hard Dollar Offering”) at a price of C\$0.50 per HD Unit, each HD Unit consisting of one common share of the Company (each an “HD Share”) and one share purchase warrant entitling the holder to purchase one common share of the Company (each an “HD Warrant Share”) at a price of C\$0.75 for each HD Warrant Share, until the date that is 36 months from the closing of the Hard Dollar Offering. The Company will use the net proceeds from the HD Offering to advance geotechnical and environmental bonding work at its wholly-owned Scotia Mine, located 60 km north of Halifax (the “Scotia Mine”), to pay deposits for critical long-lead time equipment required to commence mining operations at the Scotia Mine, and for general working capital purposes.

The flow-through component of the Offering is a non-brokered private placement of up to 250,000 common shares (“FT Units”) of the Company (the “Flow-Through Offering”) at a price of C\$0.60 per FT Unit, each FT Unit consisting of one common share of the Company (each an “FT Share”) and one half of one share purchase warrant entitling the holder to purchase one common share of the Company (each an “FT Warrant Share”) at a price of C\$0.75 for each FT Warrant Share until the date that is 36 months from the closing of the Flow-Through Offering. The Company will use the gross proceeds from the Flow-Through Offering to conduct exploration work on its mineral properties qualifying as Canadian Exploration Expenditures, as such term is defined in the *Income Tax Act* (Canada).

Certain directors, officers and other insiders of the Company are expected to acquire securities under the Offering. Such participation will be a “related party transaction” as such term is defined in Multilateral Instrument 61-101- Protection of Minority Security Holders in Special Transactions (“MI 61-101”) but is exempt from the valuation and minority shareholder approval requirements of MI 61-101.

The Offering is subject to the TSX Venture Exchange approval.

This news release does not constitute an offer to sell, or a solicitation of an offer to buy, any of the securities in the United

States. The securities have not been and will not be registered under the United States Securities Act of 1933, as amended (the “U.S. Securities Act”) or any state securities laws and may not be offered or sold within the United States or to U.S. Persons unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

CAUTIONARY STATEMENTS

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.

This news release includes certain forward-looking statements which are not comprised of historical facts. Forward-looking statements include estimates and statements that describe the Company’s future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by such terms as “believes”, “anticipates”, “expects”, “estimates”, “may”, “should”, “could”, “would”, “will”, or “plan”. Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Although these statements are based on information currently available to the Company, the Company provides no assurance that actual results will meet management’s expectations. Risks, uncertainties, and other factors involved with forward-looking information could cause actual events, results, performance, prospects, and opportunities to differ materially from those expressed or implied by such forward-looking information. Forward-looking information in this news release includes, but is not limited to, the Company’s objectives, goals or future plans, statements, potential mineralization, exploration and development results, the estimation of mineral resources, exploration and mine development plans, timing of the commencement of operations and estimates of market conditions. There can be no assurance that forward-looking statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from EDM’s expectations include, among others, the degree to which mineral resource and reserve estimates are reflective of actual mineral resources and reserves, the degree to which factors are present which would make a mineral deposit commercially viable, the price of zinc, lead and gypsum, uncertainties relating to availability and costs of financing needed in the future, changes in equity markets, risks related to international operations, the actual results of current exploration activities, delays in the development of projects, conclusions of economic evaluations and changes in project parameters as plans continue to be refined as well as future prices of metals, ability to predict or counteract potential impact of COVID-19 coronavirus on factors relevant to the Company’s business, as well as those factors discussed in the section entitled “Risk Factors” in EDM’s management’s discussion and analysis of

the Company's annual financial statements for the period ended December 31, 2021. Although EDM has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results to be not as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.
